Instruction and Rubric for Project 4

Required pages and sections to be dynamic*.
*Dynamic include two requirements:
- Data retrieved from database rather than static html files.
- Each item can be added, deleted or modified.

Page   Section
My Skills – Work Experience
My Skills – Education
Work   – My Latest Work
Hire Me – Shopping Items

Rubric
10 – HTML5 validation for each input element (emphasis on Login, Signup and
      Contact forms).
10 – JavaScript validation for each input element (emphasis on Login, Signup and
      Contact forms).
15 – Server-side (PHP) validation for each input element (emphasis on Login,
      Signup and Contact Me forms).
05 – Your resume can be downloaded on clicking Download Button on Homepage.
05 – An email notification should be sent to yourself from the Contact Form on
      clicking the Send Button.
10 – Tags "Show All, Websites, Apps etc." on Page Works are responsive, pictures
      for each item can be replaced.
20 – Database connected, data insertion, fetching and deletion work properly for
      the required sections showing above.
10 – Appropriate landing after administration and customer login. The
      administration should have the authority to add, modify or delete items in
      required pages and sections showing above, while customers do not.
10 – Database should show all data added, deleted or edited dynamically.
05 – Deploying on UTA Cloud.

Submission:
Please submit the following files in a zip file named as "your-last-name_project4".
- All your php scripts

- A screenshot for the email sent to yourself by clicking on Contact From (explicitly showing sending email address on your screenshot)
- A screenshot of your database schema
- A plain text for username and password as administration and customer*

* For grading purpose, I need your username and password, you are free to change your password once a score assigned. Also, for the same reason, some of the content on your website might be deleted or modified, new content might be added.
